In recent years psychologists have become increasingly interested in the interplay between environmental conditions and people's behavior. Conservation Psychology is the scientific study of the reciprocal relationship between human behavior and the natural environment. Conservation Psychology is an applied field, meaning that it involves the use of psychological principles, theories, or methods, to understand and solve a social issue. The course, divided into three sections, will utilize site visits, guest lectures, readings, and guided reflection. The first section of the course will examine the scientific evidence regarding a number of environmental issues, including global warming, ozone depletion, acid rain, destruction of rainforests, and depletion of natural resources like fresh water, oil, and metal deposits. For each of these issues, we will examine the specific behaviors that lead to these problems. The second section of the course will examine psychological factors associated with conservation behavior. We will examine such topics as norms, values, and incentives. The final section of the course will examine interventions designed to change human behavior. In addition, the field of Conservation Psychology (Umweltpsychologie), which is now emerging strongly as an important field of study within psychology in the United States, is well established and has a strong history in Germany. Locating the course in German cities will provide ample opportunity to compare European conservation to that of the US and to introduce students to important concepts in Conservation Psychology by directly observing how they have been applied in Germany.

For applications received by April 18th, the UMAIE Secretariat will notify each participant via e-mail by May 6, 2011. Applications received after April 18, 2011 will be sent to the faculty directors weekly and students will receive notification on a timely basis.

Information regarding recommended and/or needed immunizations can be found at the CDC website: www.cdc.gov/travel/. If you are traveling to a destination that requires an immunization, the UMAIE Secretariat will inform you in a timely manner. Additional information regarding passports, visas and immunizations is available from your campus UMAIE Board Member.
